Archaeometry Laboratory
University of Missouri

Terms and conditions for use of data from the Archaeometry Laboratory at the University of Missouri Research Reactor

These data are provided open-access through the Archaeometry Laboratory's Data Management and Sharing Policy, available at https://archaeometry.missouri.edu/data_management.html and 10.5281/zenodo.12986930. By downloading these data, you must agree to follow policies outlined in this policy. Any use of these data should cite the dataset and, when possible, the original publication or Archaeometry Laboratory Report. Digitization and sharing of these data are supported by a grant to the Archaeometry Laboratory from the National Science Foundation, number **2513554**, and we ask that this grant be acknowledged in any future publication that uses these data. We also request that a pdf copy of any publication using these data be sent to the Archaeometry Laboratory via email at archaeometrylab@missouri.edu.

Descriptive attributes in the original dataset may have been redacted to protect sensitive information, including site location information.

The Archaeometry Laboratory has developed MURRAP, a package for the statistical analysis of compositional data using the program Gauss. Both Gauss and MURRAP, along with instructions for installation and use, can be downloaded from the Archaeometry Laboratory's website at https://archaeometry.missouri.edu/gauss.html, and 10.5281/zenodo.12996241.

Additional details about data in this specific dataset can be found in the "references" file included with this dataset, including citations for any publication(s) that reference these data and for the report (if available).
